Homecare Homebase + Forcura

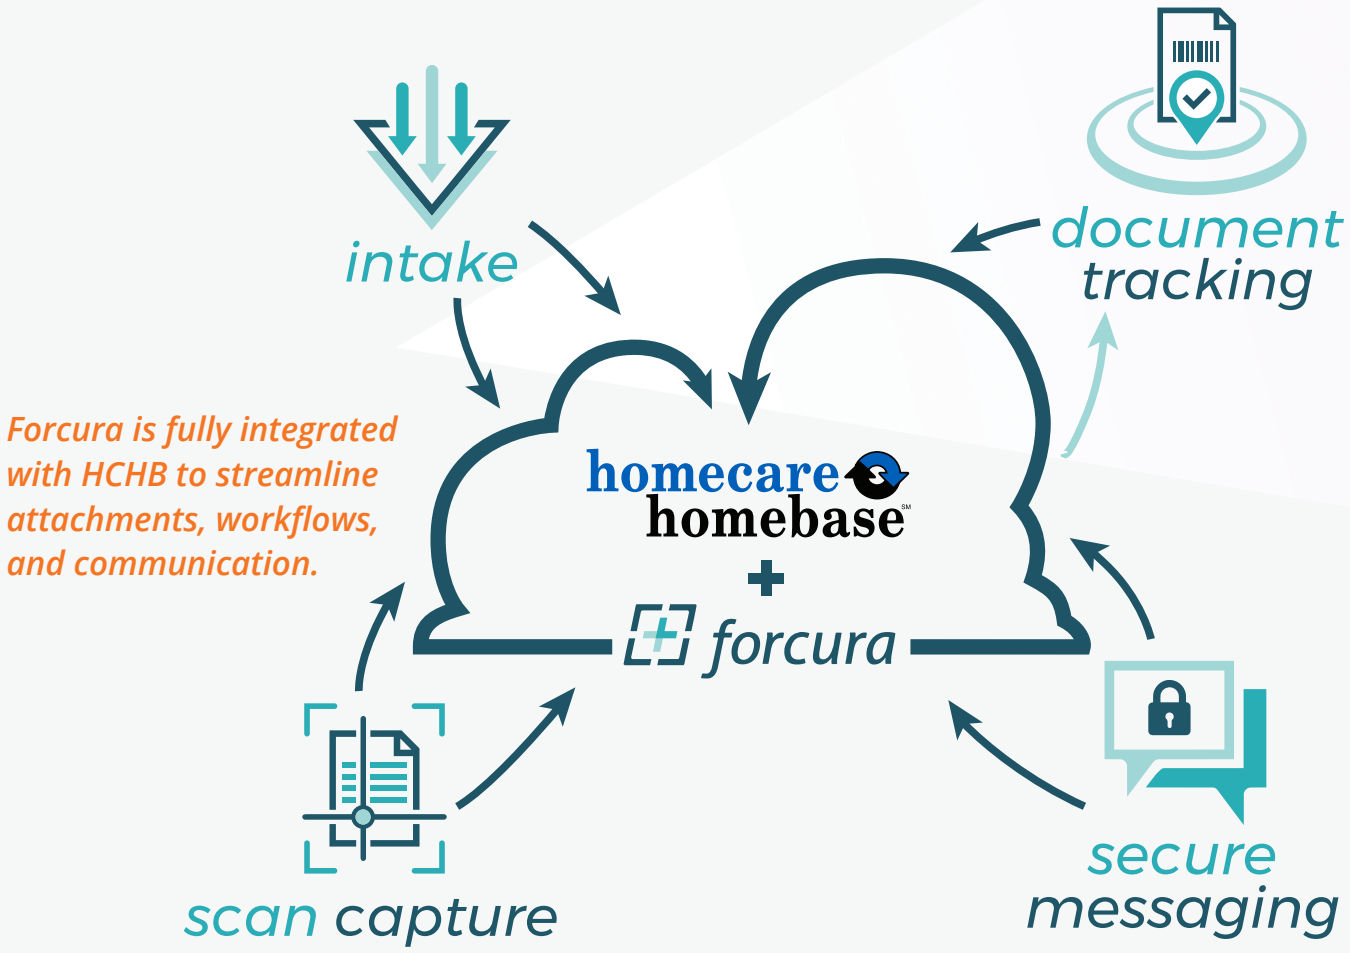
Document Management, Secure Communication and Streamlined Workflow

Our technology platform integrates with Homecare Homebase to instantly manage, track, and attach all of your organization's clinical documents and images. From intake and orders tracking to secure clinical communication, our comprehensive solution is designed specifically for home health and hospice organizations.

Our integration is designed to:

- Increase revenue
- Improve compliance
- Gather, store and integrate all clinical data within Homecare Homebase
- Support more informed care decisions
- Provide automated workflows
- Accelerate cash flows

Instantly attach all patient information to the Homecare Homebase chart.



forcura

One Platform: Four Integrated Modules Designed with Your Agency in Mind

intake

Drive referrals, authorizations and labs to one centralized location so you can spend more energy on improving care and building partner relationships – instead of processing documents and juggling administrative issues.

- Centralized document routing
- Custom reporting
- Custom forms
- Virtual print driver
- Enterprise electronic fax engine
- Patient/Physician demographic sync

document tracking

Manage all your documents required for scheduling, clinical care, reimbursement and compliance in one place to inform decision-making, enable growth and maximize the value of your existing technology investments.

- Barcode document tracking
- Document storage and archiving
- Centralized document routing
- Custom reporting
- Custom forms
- Virtual print driver
- Enterprise electronic fax engine
- Patient/Physician demographic sync

scan capture

Securely capture and send clinical images from any location and any device. All sensitive patient information is safe even if the device itself is lost or stolen.

- Capture high-definition images and documents directly from any mobile device
- Send files securely to shared locations
- Attach documents and images to the patient chart
- Auto-edge detection
- Document & image editing
- Offline functionality

secure messaging

Drive efficiency and reduce risk with HIPAA-compliant secure messaging.

- Message delivery and read receipts
- Group conversations and broadcasting
- Hands-free message dictation
- Remote archive for all messages
- Administrator oversight capacity
- Intuitive design for both office staff and clinicians

PIN and fingerprint authentication
