

# *Forcura Announces Integration to Implement Paperless Back-Office Workflow for Homecare Homebase Customers*

JACKSONVILLE, FL, June 25, 2015 — Forcura, an award-winning document workflow solution provider is excited to announce integration with Homecare Homebase that will allow users to benefit from a fully-integrated paperless document workflow, tracking, and communication system across their organization.

"We are extremely excited to provide world-class document workflow solutions to Homecare Homebase customers. The integration allows agencies to implement paperless document workflows, automate the check-in process, and provide a one-click automation of attaching documents directly to the patient chart. All of this allows the agency to focus more time on patient care," said Craig Mandeville, CEO & Founder of Forcura.

Forcura is currently working with Sta-Home Health & Hospice, Mississippi's largest home health agency, to deploy the integrated Forcura solution to automate document processes and improve compliance throughout

the organization. "We are excited about the results of our pilot with Forcura's new solution. We anticipate we will save countless hours in our billing department and branch locations by eliminating the need to scan documents by hand and the ability to better manage the sheer amounts of paper we still receive for patients," said Judy Rogers, Director of Business Operations.

Forcura's auto-scanning engine allows agencies to quickly organize documents, create a custom workflow and seamlessly attach to the patient chart within Homecare Homebase. Forcura also introduces enterprise outbound and inbound electronic faxing with bar-code technology allowing automatic linking of returned physician orders. Improved turnaround time for outstanding physician orders is just one of the many areas directly impacted by this integrated feature set. In addition, paper-heavy processes outside of Homecare Homebase, like scanning

and manual intake steps are automated with the addition of Forcura's integrated document workflow software allowing agencies to go 100% paperless.

"We constantly strive to bring solutions to our customers to further integrate them with partners they work with and find solutions to better manage the flow of data. The partnership with Forcura will enable customers using this service to implement customized and automated workflow processes to streamline the back-office, allowing for more time to be invested in patient care," said Tom Maxwell, Chief Strategy Officer at Homecare Homebase.

## **About Forcura**

Forcura is a leading document workflow technology company headquartered in Jacksonville, Florida with a focus in home health, hospice, and managed care. Forcura recently received awards for Best Use of Cloud Computing, Best CEO, and Best Places to Work. Forcura's core objective is to improve patient
