

Have You Done the Math on Your Home-based Care Agency's Business Performance?

These nine basic metrics can tell you a lot about your daily operations and help you calculate where you want to be:

- 1 Your referral decline rate
- 2 Daily volume of referrals processed per back-office staff member
- 3 Average time to onboard a patient and start care
- 4 Number of care plans processed per month
- 5 Average turnaround time for care plans
- 6 Volume of outstanding care plans (awaiting signing providers)
- 7 Which providers hold the highest volume of unsigned care plans
- 8 Accounts receivable over 30 days
- 9 Nos. 1-8, parsed by branch locations (if applicable)

Does your current technology allow you to identify and track these metrics?

With Forcura, you won't just be able to do the math – you'll find your solution.

Don't waste another day wishing you had the time or ability to truly know your business performance.
