

How Post-Acute-Care Providers Can Reduce Administrative Costs with Forcura

Process more data with fewer staff

- Centralize and digitize referrals with automated workflows
- Realtime aging and reporting to track all documentation sent to and from your organization
- Advanced reporting to view staff productivity, physician care plans by volume and age, and referral volume trends
- Update patient charts in integrated EHRs with just a click

Streamline onboarding new hires

- User-friendly interface allows new hires to quickly learn and engage in your workflows

Minimize risk by simplifying compliance and auditing processes

- Comprehensive audit trail of all data
- Date & time stamp for all user actions

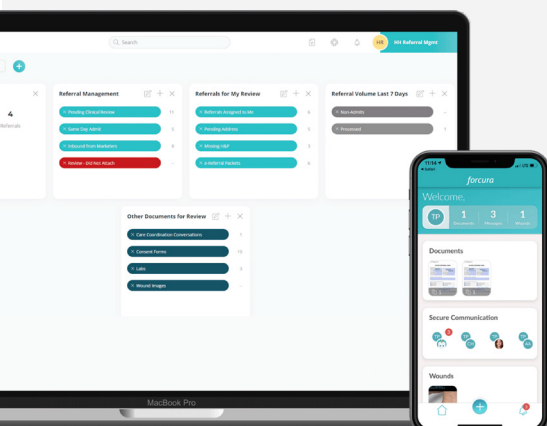

Promote collaboration across teams

- Encourage user adoption with simple interface
- Support cross-functional team engagement with one integrated platform

Eliminate hard costs with cloud-based technology

- Remove the need for printing, paper, postage, faxing, and storage

Forcura's care coordination software is the leading HIPAA-compliant web and mobile solution designed for post-acute care organizations.

With Forcura, you can manage and track all of your outstanding orders, referrals, labs, and other documents in one cloud-based platform.
