

Integration: Seamless Document Workflow with Forcura

WellSky's Preferred Document Management Partner

Documents and data tracked in Forcura are now integrated with **WellSky Home Health** and **WellSky Hospice** software, streamlining document workflow and secure communication. This powerful integration enables seamless transmission of administrative and clinical documentation and data between healthcare providers, payers, and technology systems. Together, WellSky and Forcura simplify intake and referral management and enable document tracking and management of mobile care coordination.

"By using Forcura for orders tracking, our days to final are down to between 16 and 19. It lets us see right away where we're behind and where we're not. With our sales people unable to get into offices for order signatures as they did in the past, they love the [mobile application's] scanning capability."

- Linda Murphy, Founder & COO of Concierge Home Care

How it Works

● Intake & Referral Management

Referrals are routed directly through Forcura to the patient chart in WellSky. Drive referrals, authorizations and labs to one centralized location. Spend less time on intake paperwork and improve referral partner relationships.

● Orders Management

WellSky orders are automatically sent through Forcura. All documents for clinical care, scheduling, reimbursement and compliance are managed in one place and perfectly reconciled between the two systems. This enables more informed decision-making, decreases document turnaround time, and helps you do more with less.

● Care Coordination Experience

HIPAA-compliant communication between care providers. Forcura's mobile app allows field staff to quickly share data and documents, measure and manage chronic wounds, complete and sign forms electronically, and securely communicate in real-time, from any device.

Results you can see

Increase revenue and accelerate cash flow

Decrease accounts receivable payment time by up to 63%

Scan and send documents and orders, reducing attachment time by 90%

Eliminate paper and manual faxing

Align back-office and field staff for maximum productivity

A Powerful Document Workflow Solution for WellSky Clients

"If we didn't have the platforms in place, we wouldn't have been able to efficiently blend in the new teams from our two recent acquisitions. The integration of Forcura and WellSky is a beautiful thing!"

- Linda Murphy, Founder & COO of Concierge Home Care

Intake & Referral Management

Manage all referrals with the cloud-based technology, support and confidence you need to create a more streamlined and efficient intake process

Documents are sent from referral sources to agency via fax, email, eReferral systems, or Forcura Care Coordination.

Documents (Referrals, H&P, F2F, Labs) are centrally routed to your Forcura inbox.

New patient information is entered into WellSky and automatically synced with Forcura.

Documents are organized in Forcura via built-in PDF editor and assigned to smart workflow queues.

Referral documents are attached to patient chart in WellSky and a copy is archived in Forcura.

Insurance authorization, scheduling, and the remainder of the process for admitting new patient **are completed in WellSky**

Orders Management

Automatically track documents as they are sent to and from your organization. When a signed document is returned, it is instantly reconciled, and your staff is notified that the document is ready for approval and billing.

Documents are generated and placed in the Orders Manager in WellSky.

Upon 'Check Out' in WellSky, orders are instantly transmitted through Forcura and assigned an agency-specific cover sheet as well as a barcode to each page of the order

Orders are placed in a pending signature status in Forcura or placed in queue to be printed for hand carry or mail based on physician delivery preference.

Signed orders are faxed back and all pages are instantly reconciled in Forcura via the barcode

Orders are automatically placed in QA status to verify accurate signature and date

Once approved, orders are automatically attached to patient chart under Order Task Details in WellSky and archived in Forcura
