# Digital Forms Management

A turnkey solution to manage the on-boarding and analysis of new patient referrals.

Create, manage, and auto-populate complex patient information forms from mobile devices in the field.

Utilizing forms during COVID-19: We can create any custom forms that need signature during new protocols due to COVID-19.

We offer digital forms management and live video that simplifies the administration of care in remote settings and drives interoperability.

Mobile users can access a limited number of offline forms to fill out even if WiFi or cell service is not available.

Data is automatically indexed in Forcura, electronic signatures can be captured from the field, and everything is sent to the patient chart in your EHR.

Eliminate the need to obtain and track hard copies of signed documents.

Complete state/federally mandated forms electronically.

Create custom form templates for your organization.

Securely transmit completed forms and signatures to the patient chart.
