

The Forcura Orders Management Solution

The Forcura Orders Management module offers numerous features that support getting orders sent and signed quickly and efficiently.

- Automated physician demographic sync with your EHR

- Automated and scheduled resends

- Activity tracking for all staff actions (dates, times, users, etc.)

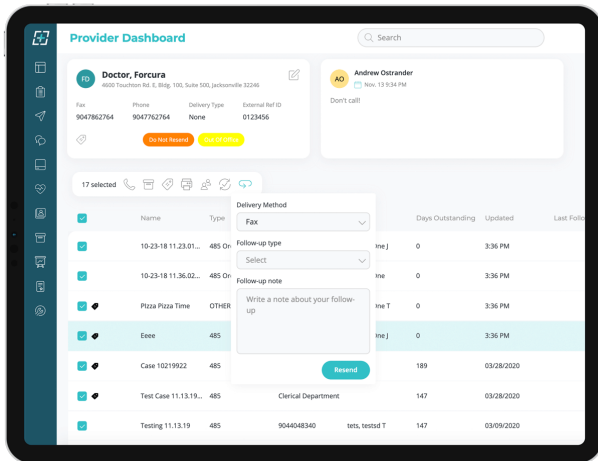

- Performance insights to consistently drive process improvement

- Bulk follow-up notes

- One-click access to all outstanding orders for each provider in your network including contact info and their unique preferences

Follow-up Tracking

- Ability to add follow-up activities and notes to outstanding orders.
- Note activities individually or in bulk so that more time is focused on follow-up and less on documentation.
- Drive your workflow based on last follow-up date to quickly identify providers that need to be contacted

Provider Dashboard

- One-click visibility into provider contact info, tags, notes, delivery preferences and ALL outstanding orders for a provider.
- Maximize touchpoints by following up on all outstanding orders for a provider at once while adhering to provider preferences.
